

side wall or bottom wall, or between the side and bottom wall without hollow for supporting a plant pot, the at least one support makes enough space for reserving fluid in the tray.

24. Canceled.

25. A self watering tray for a plant pot, comprising:

a plate, the plate having side walls and a bottom wall, the shape of the plate is different ( with ) from a plant pot, so that the top ( the side walls ) of the plate supports a pot, ( ; and )

( at least one wick or the wick with a tube accompanied with the plate which provides a fluid conduit capable of sucking fluid from the plate ).

27. A self watering tray for a plant pot, comprising:

a plate, the plate having side walls and a bottom wall, the plate holding fluid; and

at least one leg coupled to the plate, the at least one leg having two sections, up section and low section, the up section is smaller than the low section, a shoulder between the up section and the low section supporting a plant pot.

28. The tray of claim 25, further comprising at least ( one ) two notches, the at least ( one ) two notches being made by cutting a part of the side wall of the tray from ( disposed on ) the top ( up edge of the side walls of the plate for holding ), the notches support a plant pot ( and air flowing in and out of the tray ).

29. The tray of claims 1, ( and ) or 27, further comprising a fluid intake lip, the fluid intake lip disposed on the side walls of the plate, so that fluid can easy be added into the plate through the fluid intake lip.

32. Canceled.
40. Canceled.
44. The tray of claim 27, wherein the at least one leg filled with a fluid sucking material which provides a fluid conduit capable of sucking fluid from the plate.
45. The tray of claim 27, wherein a wick being ( attached on the up section ) accompanied while the at least one leg could not filled with fluid sucking material ( which provides a fluid conduit capable sucking fluid from the plate ).
46. The tray of claim 25, further comprising at least one rod, the at least one rod ( disposed ) extendes upward from ( on ) the top ( up side ) of the side walls of the plate for holding a plant pot.
47. (new) The tray of claim 1 or 25, further comprising a wick, the wick provides a fluid conduit capable of sucking fluid from the plate.
48. (new) The tray of claim 47, further comprising a tube, the wick insert into the tube.

Claims (clear verison)

1. A self watering tray for a plant pot, comprising:  
 a plate, the plate having side walls and a bottom wall, the plate holding fluid; and  
 at least one support extends from the wall of the plate either side wall or bottom wall, or between the side and bottom wall without hollow for supporting a plant pot, the at least one support makes enough space for reserving fluid in the tray.

24. ~~Canceled.~~

25. A self watering tray for a plant pot, comprising:  
 a plate, the plate having side walls and a bottom wall, the shape of the plate is different from a plant pot, so that the top of the plate supports a pot.

27. A self watering tray for a plant pot, comprising:  
 a plate, the plate having side walls and a bottom wall, the plate holding fluid; and  
 at least one leg coupled to the plate, the at least one leg having two sections, up section and low section, the up section is smaller than the low section, a shoulder between the up section and the low section supporting a plant pot.

28. The tray of claim 25, further comprising at least two notches, the at least two notches being made by cutting a part of the side wall of the tray from the top, the notches support a plant pot.

29. The tray of claims 1, or 27, further comprising a fluid intake lip, the fluid intake lip disposed on the side walls of the plate, so that fluid can easy be

~~32~~ added into the plate through the fluid intake lip.

✓ 32. Canceled.

✓ 40. Canceled.

44. The tray of claim 27, wherein the at least one leg filled with a fluid sucking material which provides a fluid conduit capable of sucking fluid from the plate.

~~G4~~ 45. The tray of claim 27, wherein a wick being accompanied while the at least one leg could not filled with fluid sucking material.

46. The tray of claim 25, further comprising at least one rod, the at least one rod extends upward from the top of the side walls of the plate for holding a plant pot.

~~Sub H5~~ 47. (new) The tray of claim 1 or 25, further comprising a wick, the wick provides a fluid conduit capable of sucking fluid from the plate.

~~G5~~ 48. (new) The tray of claim 47, further comprising a tube, the wick insert into the tube.
